the European Union

The Promoting R-Valuation of second-hand use project just started!

The main specific project objectives of R-ValuE project are:

- Promote the use of these practices and raise awareness on the importance of incorporating Green Practices in Schools.
- Allow Students to be the leaders of change for the future.
- Bridge the gap between knowledge and action.
- Sharing of ideas and promoting conversation amongst young communities all over Europe.
- Disseminate all results so we incite change at a policy level and in schools

The main, long-term goal of the R-valuE project is to introduce environmental sustainability in the school curricula, and make it a pillar of their education, which will in turn have a direct positive impact on the environment.

R-ValuE project partners propose to create a series of resources that can be integrated into Schools formal curriculum, but most importantly, into student and teachers everyday lives.

R-ValuE intends to increase awareness about environmental sustainability in students starting from early stages in education.

We plan to do it in an organic and personal way: focusing on the main current global environmental issues, while using students' personal digital stories.

The main objective will be achieved by creation of several outputs:

- Full investigation and Ebook on the perspective of Sustainability form various target groups after the Pandemic.
- Handbook with solutions for Teachers on how to integrate Sustainable practices in formal curriculum
- Student toolkit using Digital Storytelling
- Student-led piloting for their classmates and Piloting with teachers.
- OER Platform resulting in a large community to exchange best practices.
- Intensive dissemination activities including events to engage all target groups

On 9th of February, 2023, the partners of R-ValuE project met in a mixed setting, in Rome and online, in order to know each other and start working together within the project frame.

The Agenda of the meeting included all relevant aspects of the project, including main objectives, aimed results, the timeline of the project and the distribution of the project activities and tasks.

FOLLOW US ON THIS PROJECT AND WE WILL KEEP YOU UPDATED WITH THE MAIN ACHIEVEMENTS AND RESULTS!
